Please join us for a discussion event for the documentary *Picture a Scientist* at 5:10 pm on Wednesday April 14! After registering for the event, you will receive access to the film. Access can be used to watch the film anytime April 9-14.

Picture a Scientist

Featuring geologist Jane Willenbring, chemist Raychelle Burks, and biologist Nancy Hopkins, as well as key social scientists working to understand and reduce gender bias in the sciences, *Picture a Scientist* brings diversity in science into sharp view at a critical time. The current pandemic is a call to action for scientists to work together globally, with a multitude of different perspectives, to defeat COVID-19. For too long, women and other minorities in science have been left out or driven out, stymied by a system of harassment, discrimination, and general bias. ***“Any impediment to advancing minorities in science is an impediment to science itself,”*** says Sharon Shattuck, co-director of *Picture a Scientist*.

Sign up by April 8 to make sure you get access to the documentary over the weekend! Visit the site below or follow the QR code to register.
