

FOOD SCIENCE AND TECHNOLOGY 5410
FRUIT AND VEGETABLE PROCESSING
 Or Fun with pigments and enzymes

Autumn semester. The lectures are in 114 Parker Hall, 12:40-1:35 Wednesday and Friday. Labs are in the pilot plant in the basement of Howlett Hall room 59, 1-4 Monday. 3 Units

Course Goals:

1. Students understand the basic steps involved in commercially processing typical fruits and vegetables.
2. Students understand how different processing steps affect quality and safety.
3. Students understand the chemistry of fruits and vegetables, especially pigments and enzymes.
4. Students know how to operate common processing and analytical equipment.

Lab topics:

	Date	Report Due
1. Canning salsa and tomato juice	August 29	September 6
2. Enzymes and Pigments **In 124 Parker**	September 11	September 18
3. Peeling beets, apples, potatoes and carrots	September 18	September 25
4. Canning green beans: effect on color and texture	October 2	October 9
5. Jelly/Start Freezing	October 9	October 16/30
6. Finish Freezing/Start Drying	October 23	October 30/13
7. Potato chips	October 30	November 6
8. Finish Dehydration	November 6	November 13
9. Cider	November 20	November 27

The required lab format is explained in the course packet.

Required reading:

- There is a packet of lab handouts that needs to be printed out and brought to every lab
- Readings are listed by page number on the last page of the syllabus. Some of the readings include more detail than is needed for this class. The readings are posted on Carmen or you can buy the book.
- Fellows, Peter. 2009. Food processing technology: Principles and Practice. 3rd Edition. Woodhead publishing Ltd. Woodhead ISBN 978-1-84569-216-2. CRC ISBN 978-1-4398-0821-4. CRC order # N10075. Most of this textbook is posted on Carmen.

Carmen:

Information is posted under Grades and Modules. You are not required to use Carmen for this class. Some class notes and useful files are posted under Modules.

<u>Instructor:</u>	<u>Assistant:</u>	<u>Pilot Plant Supervisor:</u>
Dr. Sheryl Barringer 688-3642 110 Parker Hall barringer.11@osu.edu	Dr. Hardy Castada 247-1945 264C Howlett castada.1@osu.edu	Jeff Caminiti Wen Cong 48j Howlett 266 Parker cong.28 caminiti.8
		Matt Papic 292-4045 Pilot Plant, Howlett papic.1@osu.edu

Office hours: drop by anytime, or make an appointment through Julie Townsend.57

Laboratory Exercises:

Laboratories will be done in the pilot plant of Howlett Hall. We will be using real processing equipment, so remember that accidents can happen. Report ALL accidents to the instructor, pilot plant supervisor or Assistant immediately. No high heels, open toed shoes or shoes with slippery soles are allowed in the pilot plant. You must wear long pants that go to your ankles. No loose, dangly jewelry or sleeves. Do not wear nice clothes to the lab. Laboratory aprons will be provided but you may still get wet or dirty. Hair and beard (if appropriate) nets are required. Exercise caution when working around equipment that is in motion. For the Pigments and Enzyme lab you will need to bring a lab coat and we will be in 124.

Be certain you read the lab (all labs we are doing that week) before coming to class and turn in the answers to the prelab questions before lab (for all labs we are doing that week). For each laboratory exercise, a written lab report is required. This report is due a week later, at the beginning of the class. It cannot be emailed. If you are late to lab, your report will be counted late. Reports must be neat and readable or they will not be graded. Late lab reports will lose 10 pts if up to one day late, 20 pts if up to two days late and will not be accepted after a week. There are no make-up labs. If you miss the lab, you cannot get points for turning in the lab report. If you have a medical emergency, you need to contact me so we can talk about it. The information needed to answer the questions should have been given in lecture, but ask if you need more information.

Remember to clean up after each lab exercise. This includes hosing down all equipment, taking apart and cleaning equipment where necessary, discarding any garbage and wiping down all surfaces. Any students who leave before the entire area is clean, or do not help with the cleaning, will have points taken off of their lab reports.

At the beginning of each lab, students will first wash their hands and put on their hair nets, then divide into groups and choose a leader. The leader will be in charge of making sure all of the work is done, results are reported to the rest of the class, and everything is clean before leaving. Everyone must lead a group at least once. Make sure you understand what the other groups did. Ask questions at the end of the lab if you are unsure.

Exams: There will be 2 exams and a cumulative final. You are not allowed to use any notes on the exams. Once you leave the exam, you cannot return unless you have made special arrangements with me before the exam starts. That includes going to the bathroom.

Exam hints: If you are asked for 4 reasons, give at least 5. You can get full credit for using excellent logic but coming to the wrong final answer. However, if you don't explain your reasons you can't get partial credit.

Grading:

The grading breakdown is:

Lab reports, homework, applications and quizzes	30%
Exams	20%, 20% and 30%
Attendance	(-1%)

With each exam you will be given a list of the questions. You have 24 hours (due at 3pm the next day) to return the list with the correct answer for any question you feel you answered incorrectly on the exam. Correct answers on the original exam will not be regraded down. You may do this by email, fax, in my mailbox or under my door. You will receive 1/3 credit for each question answered correctly, that was previously wrong.

The class is graded on a straight scale: 100-93 = A, 92-90 = A-, 89-87 = B+, 86-83 = B, 82-80 = B-, 79-77 = C+, etc. It is acceptable (and desirable) for the entire class to receive As, if you earn them.

Grades will periodically, but not regularly, be posted on Carmen.

Homework and Lab Reports:

Every Monday there is a homework assignment or lab report due. See the course packet for more instructions on what is expected in the lab reports.

Possibly useful texts and websites.

Canning, retorting:

Lopez, A. A Complete course in canning. The Canning Trade. Ch 9 and 12

The Almanac of the canning, freezing and preserving industry. TX599. Contains part of the CFR

General fruits and vegetables:

Food chemistry [computer file] / edited by Owen R. Fennema. Available through the library as hard copy and electronically. There are 4 editions, but the third (1996) is the best. <http://library.ohio-state.edu/search~S7?/afennema%2C+owen/afennema+owen/1%2C1%2C12%2CB/frameset&FF=afennema+owen+r&5%2C%2C12>

Chemical structures and characteristic aroma: <http://www.flavornet.org/flavornet.html> then enter the name. <http://library.ohio-state.edu/screens/databases.html> then to Food Science and Technology Abstracts (FSTA) for flavors and pigments

Postharvest physiology, respiration, etc:

Kays SJ. 1991. Postharvest physiology of perishable plant products. Avi Books. New York.

Wills, R.B.H., W.B. McGlasson, D. Graham, T.H. Lee and E.G. Hall. 1989. Postharvest. BSP Professional Books. Carlton, Australia ISBN 0442439432.

Academic Misconduct:

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct <http://studentlife.osu.edu/csc/>.

Students are allowed to work on their lab reports together, but each student must write their own report in their own words.

Disability Services

Students with disabilities that have been certified by the Office for Disability Services will be appropriately accommodated and should inform the instructor as soon as possible of their needs. The Office for Disability Services is located in 150 Pomerene Hall, 1760 Neil Avenue; telephone 292-3307, TDD 292-0901; <http://www.ods.ohio-state.edu/>.

		Lab (Monday)	Due in Lab	Lecture (Wed, Friday)	Due in lecture
Aug	23-25 w1			Syllabus. Tomato intro for the lab. Water and CHO.	11-32 composition
	28-1 w2	Tomato salsa		Tomato review. F vs. V. Minor components. Enzymes. Pigments.	99-100, 103-122 raw materials
Sep	6-8 w3	(Labor Day)		Steps in processing.	Tomato lab
	11-15 w4	Enzymes Pigments <u>In 124</u>	Homework 1	Steps in processing. Low acid foods. Cans and retorts.	369-378 blanching. 359-360 microbial death.
	18-22 w5	Peeling	Enzyme lab	Cans and retorts.	Essay on tomato lab mistakes 396-401 retort theory; 408-415 retorts.
	25-29 w6	Cumulative Quiz <u>in 311</u>	Peeling lab	Retorts. Aseptics. EXAM FRIDAY.	
Oct	2-6 w7	Canning green beans	Homework 2	Jam. Tomato tour. Freezing.	650-652, 659-667, 676-682 Freezing.
	9-11 w8	Jelly/Freezing	Green bean lab	Freezing. (Autumn break)	
	16-20 w9	Cumulative Problem Solving <u>in 311</u>	Jelly lab	Freezing. Water activity.	
	23-27 w10	Freezing/Drying	Homework 3	Drying. Potato chip processing.	40-44 water activity.
Nov	30-3 w11	Potato Chips	Freezing lab	Drying	485-489 drying theory 516-521 drying equip.
	6-10 w12	Drying	Potato chip lab.	Drying. (Veteran's Day)	
	13-17 w13	Cumulative Quiz <u>in 311</u>	Drying lab	Juice. EXAM FRIDAY	
	20 w14	Cider	Homework 4	(Thanksgiving)	
	27-1 w15	Cumulative Problem Solving <u>in 311</u>	Cider lab	Grades & standards. Postharvest physiology. CAP/MAP. Refrigeration. humidity	623-624, 635-636 CA. Review questions and answers by email.
Dec	4-6 w16	Review <u>in 311</u>	Homework 5	Defenders. Waste and water. Irradiation. Sanitation	
	W 17	Final Exam Monday Dec 11, 2017 4:00-5:45pm
